INDEX.HTML

A small vote of thanks to my parents, mentors, all the Youtube geeks and Mr. Ken for helping me improve my project.

—Acknowledgement

⟶ /About me

Name: Arnav Kumar

**Age:** 16 years old

Class: 11th

Location: Dubai (Indian High School)

My interest in this field: My interest began since the time I started to hear about technologies used in latest phones and in smart cars like Tesla, it grew over time, and I started to get engrossed in the field of Artificial Intelligence and its many usage.

⟶ /My intership journey with Clevered

This has been my first internship of my life and to say the least its been very helpful from the very first session. I have made an immense amount of progress in the field of coding and AI in the past 3 months which I wouldn't have been able to do it without this internship.
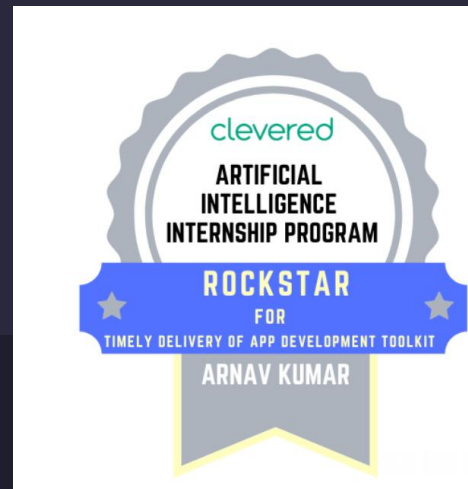

⟶ /About the app:

This is going to be the main screen of the app wherein the user is going to be able to access all the features that come with the product. My aim with this project is to reach out to an audience who feel lonely, left out or aren't the most socializing.
